The quality of the air around you is essential to your health and wellbeing, which makes effective air filtration key. Evening Breeze's Absolute Filter creates an exceptionally clean environment, supporting a restful and restorative night.

Norm	Rating
EN779	F7
EN1822-1	E10
ASHRAE 52.2	MERV 15

Table 1. Evening Breeze Absolute Filter Class.

Measured against the standards above, the Absolute Filter captures a very high percentage of airborne particles down to 0.3 micrometres (µm), helping to remove:

- ✓ Pollen, mold fungi and plant spores
- ✓ Airborne particles carrying bacteria and viruses
- ✓ Smoke and fine traffic or combustion emissions
- ✓ Dust mites and pet dander and sneeze nuclei

Air quality depends on both air filtration and air circulation. Evening Breeze runs 20 air changes per hour (ACH) throughout the conditioned area, so the air passes through the filter every three minutes, providing immediate and lasting clean air for optimal health and safety.

Regular cleaning helps maintain the Absolute Filter's performance, and Evening Breeze recommends cleaning it every two months.
