

eveningbreeze

Evening Breeze in a nut shell:

- Encourage open architecture and natural ventilation.
- Energy effective cooling; perfectly viable for solar.
- Unmatched comfort; for perfect sleep and relaxation.

The beauty of open plan architecture:

- ✓ Totally immersed in the surrounding environment.
- ✓ Offer travellers ultimate sense of place.
- ✓ Enjoy total architectural freedom.
- ✓ Go natural with wood, thatch and canvas.
- ✓ Ride the prevailing travel trend.

Sausage Tree, Zambia

As part of Green Safaris commitment to enhancing our guest experience in only the most sustainable of ways, there will be a few exciting changes at Sausage Tree Camp. Firstly, we are introducing the Evening Breeze, an energy-efficient air conditioning system. This cutting-edge technology will ensure guest comfort during the hotter months, but what is most exciting is that it will have a zero carbon footprint. The Evening Breeze will be powered through the existing solar power system, which will be amped up in order to supply the extra power needed.
