cooling personal spaces

A hand holds a sleek, black remote control with several glowing buttons. The buttons are arranged vertically and include icons for 'OFF', 'SLEEP', 'FAN', 'HEAT', 'COOL', and 'AUTO'. The 'SLEEP' button is highlighted in green, while the others are blue. The background shows a modern living room with a large window overlooking a lush, green mountain landscape. A grey armchair and a potted plant are visible on the left, and a wooden bench with cushions is on the right.

simply select  
your desired  
sleeping climate

cool clean  
air silently  
spreads over  
your bed

The perfect sleeping climate at  
the touch of a button

Feeling hot and sweaty at night? Simply select your preferred cooling level, lay  
back and experience pure delight while cool air gently drops down on your bed.

## Comfortable

After selecting your preferred sleeping climate, cool clean air will gently circulate over the surface of your bed—carrying with it the promise of a good night's sleep.

### EveningBreeze

Comfortable, refreshing and revitalizing. Forget noise. Forget drafts.

## Healthy

EveningBreeze creates a cool, pure climate for you to sleep in, leaving the rest of the room in its natural state. Cleaner, fresher air means a healthier environment and a more restful sleep.

### EveningBreeze

No more dry skin, sore throats and nasty colds.

## Effective

The microclimate created around your bed drastically decreases the energy needed for your sleeping comfort. This means lower monthly energy bills and a reduction of your carbon footprint—another reason you'll sleep easy.

### EveningBreeze

Higher comfort levels, a clear conscience and lower energy bills.

breath clean  
and healthy air

Open up and  
let the fresh air in

Since the cooling is concentrated on  
the bed area, air tight insulation of  
your room is no longer required. So  
feel free to open up and let some fresh  
oxygen-rich air in.
